PRODUCT DESCRIPTION

Con-Tech supplies **red beer keg caps** and accessories to satisfy the exacting standards of breweries throughout the world.

Since 1996, Con-Tech has supplied the [food and beverage packaging parts industry](#) with a diverse menu of products from manufacturers in China, Taiwan, India and elsewhere, many of whom are [ISO certified](#). Our customers make products ranging from potato chips, maple syrup and peppermint oil to vodka and elderberry shots.

Con-Tech [outsources manufacturing](#) also contributes to the packaging of natural flavorings and oils used in foods chosen to deliver the highest quality at lowest cost available anywhere. These packaging products, many of which are on hand and ready for immediate delivery, are used in foods as well as in products ranging from oral care to chewing gum and pharmaceuticals.

We provide red beer keg caps, which are small plastic tops covering keg neck openings. Our beer keg caps perform a vital function in protecting the valve from debris build up leading to mold and potential product ruination.

We also supply [forged and machined beer keg necks](#) and accessories to satisfy the exacting standards of breweries throughout the world. Con-Tech also sells sanitary pumps for used

International resources for your world
in the highly regulated food area.

Our beer key necks, couplings connecting valves to beer kegs, are available in both US "draft style" and standard European 14 tpi European threaded styles. Both are subjected to **Statistical Process Control** for certain dimensions and are stain and rust resistant as they are composed of special stainless steel. Stainless steel, an iron-containing alloy made up of two or more chemical elements, comes in more than 57 stainless steel standard alloys along with numerous proprietary alloys.

Our **beer keg** accessories are usable for beer kegs, green items that are frequently recycled. The largest keg-refurbishing company in the U.S. cleans, repairs and sterilizes as many as 100,000 units every year. With a typical lifespan of 30 years, kegs are incredibly durable.
