Con-Tech has been a primary supplier to the IBC industry since 1994. Working with all segments of the industry from Tote manufacturers to reconditioners/cleaners, and end-users, Con-Tech has been a reliable source with a knack for finding the right parts for your needs.

In addition to the industry-standard Voyager Ball Valves, we stock a comprehensive inventory of replacement parts so that you can get your asset tanks back into service in the most expedited manner possible.

Please contact us if you have questions about parts options for your Totes or for advice on how to resolve parts-related problems. We look forward to being of use in your search for the ideal components – ones that the original Tote manufacturers rely on and that you can too!
