

FREEZEPRO®

Frost Protection Systems

FREEZEPRO® DRUM

FreezePro® Frost Protection Systems deliver a barrier of uniform, directional heat where it is needed most - to tanks, pipelines, drums, buckets, IBC totes, and other temperature sensitive equipment. The advanced, all-in-one design of FreezePro® eliminates the need for multiple product purchases and simplifies the entire implementation process while saving time and money. The end result is an efficient heating solution with the most cost-effective method for minimizing damage caused by harsh or freezing temperatures.

FreezePro® Drum Insulation Jackets are designed to ensure temperature stability for temperature-sensitive products during the transport, handling and storage of chemicals, fluids, and bulk materials.

Applications:

- 55-gallon barrels
- 55-gallon drums
- 55-gallon steel drums
- Composite buckets
- 1-gallon buckets
- 5-gallon buckets
- 10-gallon buckets

Optional Accessories:

FreezePro® Drum Insulated Lid

ETC Single-Stage Temperature Controller

NOTE: FreezePro® Drum Jackets do not come with an insulated lid. FreezePro® Drum Lids must be ordered/purchased separately. FreezePro® Drum Lids also fit certain sizes so make sure you are buying the right size for your FreezePro® Drum Jacket.

FREEZEPRO[®]

Frost Protection Systems

Use:

FreezePro[®] Frost Protection Systems are used for freeze protection or temperature maintenance of piping, tanks, and equipment. They are specially designed to maintain desired temperatures through an evenly heated area, keeping chemicals and other industrial materials within customer-defined temperature ranges. Recommended for applications ranging from -40°F (-40°C) to 200°F (93°C).
